

MOKSH GUPTA

SOFTWARE ENGINEER

Highly motivated and enthusiastic Computer Science Engineering student with a strong foundation in C++, DSA, HTML, CSS, and JS. Possess a passion for technology and software development, with experience working on several projects that demonstrate problem-solving skills and creativity. Seeking an opportunity to apply skills and knowledge to contribute to an innovative and dynamic team.

I am a quick learner, team player, and possess excellent problem-solving and communication skills that will enable me to work effectively with cross-functional teams to deliver high-quality software products.

SKILLS

- Proficient in C++ programming language
- Strong knowledge of data structures and algorithms (DSA)
- Proficient in web development technologies such as HTML, CSS, and JavaScript (JS)
- Experience working with MySQL and other database management systems (DBMS)
- Strong problem-solving and analytical skills
- Ability to work independently as well as part of a team

EDUCATION • IMS ENGINEERING COLLEGE

Bachelor of Technology | Computer Science Engineering
University of Lucknow | 2020 - 2024

PROJECT

• ONLINE EXAM PORTAL

Full Stack Developer | 2022-2023

- Designed and developed an online exam portal that allows students to take exams online and receive instant results.
- Developed the front-end using HTML, CSS, and JavaScript, and utilized as the front-end framework.
- Implemented a secure login system and integrated it with a MySQL database to store user information and exam results.
- Successfully launched the online exam portal, allowing students to take exams remotely during the COVID-19 pandemic.
- Improved the user experience by designing a responsive and intuitive exam-taking interface.

• MOVIE VERSE

Full Stack Developer | 2022-2023

- Collaborated with a team of 4 developers to design and develop a web application that provides users with information about movies and TV shows, including ratings, reviews, and recommendations.
- Developed the front-end using HTML, CSS, and JavaScript, and integrated with a back-end built with Node.js and MySQL database.
- Implemented search functionality using Algolia search API to allow users to search for movies and TV shows by title, genre, and other criteria.
- performed testing and debugging to ensure optimal performance and user experience.
